Describe any trading suspension orders issued by the SEC concerning the issuer or its predecessors since inception:

On April 6, 2020, the Company received an Order of Suspension of Trading dated April 3, 2020 (the "Order") from the United States Securities and Exchange Commission ("SEC"). The temporary suspension period is from 9:30 a.m. EDT on April 3, 2020, through 11:59 p.m. EDT on April 20, 2020. The Order refers to questions raised regarding the adequacy and accuracy of publicly available information concerning "NBDR, including, since at least March 11, 2020, among other things, statements about NBDR's products and business activities related to the COVID-19 pandemic, including NBDR's COVID-19 specimen collection kits, an agreement to bring COVID-19 test kits to the United States, and NBDR's activities related to the distribution of personal protective equipment. Those concerns relate to statements NBDR made in: (1) social media posts since at least March 11, 2020; (2) press releases since at least March 16, 2020; (3) NBDR's website since at least March 24, 2020; and (4) submissions to OTC Markets Group, Inc. since at least March 25, 2020."

In an effort to protect the interests of shareholders, the SEC has issued similar orders and suspensions recently to over two dozen registrants, with concerns over the validity of claims made in connection with the availability of COVID-19 tests and supplies.

The Company, along with its counsel, is cooperating fully with the SEC to substantiate the Company's recent public announcements and business endeavors and is addressing any questions and/or concerns raised regarding the accuracy of the assertions made in the Company's press releases.

Pursuant to Rule 15c2-11 under the Exchange Act, at the termination of the trading suspension, no quotation may be entered unless and until the Company has strictly complied with all provisions of the rule, including the filing of a new Form 15c2-11 with FINRA.

The Company must have a FINRA Member Market Maker file a 15c2-11 with FINRA in order for the Company's shares to resume trading on the OTC Markets. These actions do not impact or otherwise affect the Company's results of operations.

As of the date of filing, the trading suspension period expired, and the Company is in the process of compiling the information required for its 15c2-11 submission by a FINRA Member Market Maker. The Company anticipates the filing of a new Form 15c2-11 as soon as practicable.

**NO BORDERS, INC. NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2021 AND 2020**

NOTE 1 – ORGANIZATION AND DESCRIPTION OF BUSINESS

No Borders, Inc. (the “Company”) was incorporated on May 28, 1999 in the state of Nevada. On December 13, 2013, the Company purchased Action Sports Media, Inc. which was incorporated under the laws of the state of Nevada. On December 13, 2013, the Company executed an asset purchase agreement with the Company’s former CEO and his sole proprietorship dba TYME, (“TYME”), a private marketing business. On March 6, 2018, the Company acquired Lannister Holdings, Inc. and renewed its business strategies as a holding company with subsidiaries in the cannabinoid, dental, education, software, and distributive ledger industries. The Company’s current primary focus verticals are the US human and pet wellness CBD market and the medical/dental equipment and supplies vertical. The Company’s motivation is to create outsized results by utilizing best in class technologies, sales systems and data based digital marketing initiatives to simultaneously build multiple dominate brands across many different industries, while utilizing the Company’s lean operating and remote work models to achieve streamlining of the front and back-end procedures in those industries.

The Company currently operates five subsidiaries, No Borders Naturals, Inc., a wholly owned subsidiary, No Borders Dental, Inc., an eighty (80%) percent owned subsidiary, No Borders Education, Inc., an eighty (80%) percent owned subsidiary, No Borders Labs, Inc., and No Borders Funding, Inc. both of which are wholly owned subsidiaries. The subsidiaries will concentrate on online sales, tradeshow, and scalable distribution channels, in order to sell the Company’s products and to market the Company’s brands.

Our No Borders Naturals, Inc., subsidiary sells hemp-derived CBD (“CBD”) products that incorporate ingredients derived from hemp.

CBD hemp oil is extracted from the cannabis varieties that are naturally abundant in CBD and low in THC (the principal psychoactive constituent (or cannabinoid) of cannabis). A specialized extraction process is used to yield highly concentrated CBD oil that also contains other potentially nutritious materials such as omega-3 fatty acids, terpenes (a class of organic compounds which when modified are used in a variety of medicines and alternative medicines such as aromatherapy), vitamins, chlorophyll, and amino acids. Our products have less than the federal legal limit of 0.3% THC.

Our hemp-derived CBD is independently lab tested to ensure all of our individual product batches are below 0.3% THC content. Marijuana and Cannabinoid (CBD) derived from Marijuana is regulated under the Controlled Substances Act. We do not believe that our hemp-derived CBD products are regulated under the Controlled Substances Act, but under the Agricultural Act of 2018, known as the “Farm Bill”.

The 2018 Farm Bill allows for the interstate sale and transfer of hemp-derived products for commercial or other purposes. It also puts no restrictions on the sale, transport, or possession of hemp-derived products, so long as those items are produced in a manner consistent with the law. The Farm Bill ensures that any cannabinoid—components of CBD—that is derived from hemp will be legal, if that hemp is produced in a manner consistent with the Farm Bill, associated federal regulations, associated state regulations, and by a licensed grower as defined in the Farm Bill.

Our No Borders Dental, Inc., dba MediDent Supplies, sells medical products in some of the most attractive segments of the medical products industry, including x-rays, cleaning, dental chairs, operating packages, personal protection equipment, face masks and dental imaging technologies. We sell and market one of the most comprehensive portfolios of medical supplies providing high quality products to medical / dental professionals, first responders, government agencies and consumers around the globe. Our medical consumables, and equipment choices that we offer to medical professionals and civilians alike cover an estimated 90% of a practice’s supply needs for successful daily operations. As a medical products company, we also sell viral testing supplies to qualified purchasers.

Our No Borders Education subsidiary is working to develop online and event based educational courses with a focus on Professional Continuing Education, Adolescent Software Education & Vertical Specific Curriculum Development.

Our No Borders Labs, Inc. subsidiary is responsible for deploying all of the technologies, systems, data acquisition, analytics, digital engagement, and digital properties of the No Borders family of companies. Committed to pushing the edge of real-world technological deployment No Borders Labs is an integral part of the Company's mission to disrupt vertical's whose market participants are behind the curve of technological adoption or deployment.

No Borders, Inc. and its subsidiaries are hereinafter referred to as the "Company."

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of presentation

The Company's unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP") and all intercompany transactions have been eliminated in consolidation. In the opinion of management, the accompanying unaudited consolidated financial statements reflect all adjustments, consisting of only normal and recurring adjustments, necessary for a fair presentation of the results of operations, financial position and cash flows for the periods presented.

Use of estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Accordingly, actual results could differ from those estimates. Such estimates include management's assessments of the carrying value of certain assets, useful lives of assets, and related depreciation and amortization methods applied.

Cash equivalents

The Company considers all highly liquid investments with an original maturity of three months or less when purchased to be cash equivalents. At December 31, 2021 and December 31, 2020, the Company had no cash equivalents besides what was in the cash balances as of those dates.

Accounts Receivable

Trade receivables are carried at their estimated collectible amounts. Trade credit is generally extended on a short-term basis; thus, trade receivables do not bear interest. Trade accounts receivable are periodically evaluated for collectability based on past credit history with customers and their current financial condition. The balance as of December 31, 2021 and December 31, 2020 was \$991,096 and \$660,724, respectively.

Allowance for Doubtful Accounts

Any charges to the allowance for doubtful accounts on accounts receivable are charged to operations in amounts sufficient to maintain the allowance for uncollectible accounts at a level management believes is adequate to cover any probable losses. Management determines the adequacy of the allowance based on historical write-off percentages and the current status of accounts receivable. Accounts receivable are charged off against the allowance when collectability is determined to be permanently impaired. As of December 31, 2021 and December 31, 2020 allowance for doubtful accounts was \$-0- and \$-0- respectively.

Inventory

The Company's inventory is valued at the lower of cost or market under the FIFO method of costing. All inventory included in the balance sheets as of December 31, 2021 and December 31, 2020 are made up of finished goods. Total value of finished goods inventory as of December 31, 2021 and December 31, 2020 was \$12,940,406 and \$3,063,534, respectively. No allowance as necessary as of December 31, 2021 and December 31, 2020.

Fair value of financial instruments

The Company measures assets and liabilities at fair value based on an expected exit price as defined by the authoritative guidance on fair value measurements, which represents the amount that would be received on the sale of an asset or paid to transfer a liability, as the case may be, in an orderly transaction between market participants. As such, fair value may be based on assumptions that market participants would use in pricing an asset or liability. The authoritative guidance on fair value measurements establishes a consistent framework for measuring fair value on either a recurring or nonrecurring basis whereby inputs, used in valuation techniques, are assigned a hierarchical level.

The following are the hierarchical levels of inputs to measure fair value:

- Level 1 – Observable inputs that reflect quoted market prices in active markets for identical assets or liabilities.
- Level 2 - Inputs reflect quoted prices for identical assets or liabilities in markets that are not active; quoted prices for similar assets or liabilities in active markets; inputs other than quoted prices that are observable for the assets or liabilities; or inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- Level 3 – Unobservable inputs reflecting the Company’s assumptions incorporated in valuation techniques used to determine fair value. These assumptions are required to be consistent with market participant assumptions that are reasonably available.

The carrying amounts of the Company’s financial assets and liabilities, such as cash, accounts receivable, other current assets, accounts payable & accrued expenses, other current liabilities, certain loans payable and convertible notes payable approximate their fair values because of the short maturity of these instruments.

Intangible Assets

Intangible assets with indefinite useful lives are measured at their respective fair values as of the acquisition date. We do not amortize intangible assets with indefinite useful lives. Intangible assets with finite useful lives are amortized over their estimated useful lives, primarily on a straight-line basis, and are reviewed for impairment when facts or circumstances suggest that the carrying value of these assets may not be recoverable.

Property and Equipment

Property and equipment is stated at cost, less accumulated depreciation and is reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable.

Expenditures for major additions and betterments are capitalized. Maintenance and repairs are charged to operations as incurred. Depreciation is computed by the straight-line method over the assets estimated useful life of three (3) years for equipment, five (5) years for automobile, and seven (7) years for furniture and fixtures. Upon sale or retirement of property and equipment, the related cost and accumulated depreciation are removed from the accounts and any gain or loss is reflected in statements of operations. At December 31, 2021, property and equipment totaling \$64,361 with accumulated depreciation of \$20,861. Depreciation expense for the year ended December 31, 2021 was \$17,457 and depreciation expense for the year ended December 31, 2020 was \$ 3,404.

Convertible Promissory Note

The Company accounts for convertible promissory notes in accordance with ASC 815, Derivatives and Hedging since the conversion feature is not indexed to the Company’s stock and cannot be classified in equity. The Company evaluates embedded conversion features within convertible debt to determine whether the embedded conversion feature should be bifurcated from the host instrument and accounted for as a derivative at fair value with changes in fair value recorded in the Income Statement. If the conversion feature does not require recognition of a bifurcated

derivative, the convertible debt instrument is evaluated for consideration of any beneficial conversion feature (“BCF”) requiring separate recognition. When the Company records a BCF, the intrinsic value of the BCF is recorded as a debt discount against the face amount of the respective debt instrument with an offset to additional paid-in capital and amortized to interest expense over the life of the debt. There were no notes as of December 31, 2021 and December 31, 2020 with a BCF that would warrant the recording of a debt discount and/or derivative liability.

Commitments and contingencies

The Company follows subtopic 450-20 of the FASB ASC to report accounting for contingencies. Liabilities for loss contingencies arising from claims, assessments, litigation, fines and penalties and other sources are recorded when it is probable that a liability has been incurred and the amount of the assessment can be reasonably estimated.

Revenue recognition

Effective January 1, 2018, the Company adopted ASC 606 – Revenue from Contracts with Customers. Under ASC 606, the Company recognizes revenue from the commercial sales of products, licensing agreements and contracts to perform pilot studies by applying the following steps: (1) identifying the contract with a customer; (2) identify the performance obligations in the contract; (3) determine the transaction price; (4) allocate the transaction price to each performance obligation in the contract; and (5) recognize revenue when each performance obligation is satisfied.

Advertising and Promotion

The Company follows the policy of charging the costs of advertising and promotion to expense as incurred. Accordingly, the Company charged to operations in amount of \$617,280 and \$515,424 for the years ended December 31, 2021 and 2020, respectively.

Income taxes

The Company follows Section 740-10-30 of the FASB ASC, which requires recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the financial statements or tax returns. Under this method, deferred tax assets and liabilities are based on the differences between the financial statement and tax bases of assets and liabilities using enacted tax rates in effect for the fiscal year in which the temporary differences are expected to be recovered or settled. Deferred tax assets are reduced by a valuation allowance to the extent management concludes it is more likely than not that the assets will not be realized. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

The Company adopted section 740-10-25 of the FASB ASC (“Section 740-10-25”) with regards to uncertainty in income taxes. Section 740-10-25 addresses the determination of whether tax benefits claimed or expected to be claimed on a tax return should be recorded in the financial statements. Under Section 740-10-25, the Company may recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position should be measured based on the largest benefit that has a greater than fifty percent (50%) likelihood of being realized upon ultimate settlement. Section 740-10-25 also provides guidance on de-recognition, classification, interest and penalties on income taxes, accounting in interim periods and requires increased disclosures. The Company had no material adjustments to its assets and/or liabilities for unrecognized income tax benefits according to the provisions of Section 740-10-25.

Stock-Based Compensation

The Company recognizes compensation costs to employees under FASB Accounting Standards Codification 718 “Compensation - Stock Compensation” (“ASC 718”). Under ASC 718, companies are required to measure the compensation costs of share-based compensation arrangements based on the grant-date fair value and recognize the costs in the financial statements over the period during which employees are required to provide services. Share based compensation arrangements include stock options and warrants. As such, compensation cost is measured on the date of grant at their fair value. Such compensation amounts, if any, are amortized over the respective vesting periods of the option grant.

On July 27, 2018, the inception date, the Company adopted ASU No. 2018-07 “Compensation - Stock Compensation (Topic 718): Improvements to Nonemployee Share-Based Payment Accounting.” These amendments expand the scope of Topic 718, Compensation - Stock Compensation (which currently only includes share-based payments to employees) to include share-based payments issued to nonemployees for goods or services. Consequently, the accounting for share-based payments to nonemployees and employees will be substantially aligned.

Noncontrolling Interest

The Company records “Noncontrolling interest,” which has historically related to consolidated subsidiaries, on its consolidated balance sheets. The Company records “Loss (income) attributable to noncontrolling interest” on its consolidated statements of operations, reflecting the subsidiaries’ net loss (income) for the reporting period, adjusted for changes in the noncontrolling interest holders’ claim to net assets, including contingent milestone, royalty and option payments, each of which is evaluated each reporting period.

Net loss per share

The Company computes basic and diluted earnings per share amounts pursuant to section 260-10-45 of the FASB ASC. Basic earnings per share is computed by dividing net loss available to common shareholders, by the weighted average number of shares of common stock outstanding during the period, excluding the effects of any potentially dilutive securities. Diluted earnings per share is computed by dividing net loss available to common shareholders by the diluted weighted average number of shares of common stock during the period. The diluted weighted average number of common shares outstanding is the basic weighted number of shares adjusted as of the first day of the year for any potentially dilutive debt or equity.

There were no potentially dilutive shares outstanding as of December 31, 2021 and 2020, respectively.

Reclassifications

Certain prior period amounts have been reclassified to conform to the current period presentation.

Related Parties

The Company follows subtopic 850-10 of the FASB Accounting Standards Codification for the identification of related parties and disclosure of related party transactions.

Pursuant to Section 850-10-20 the related parties include a. affiliates of the Company; b. Entities for which investments in their equity securities would be required, absent the election of the fair value option under the Fair Value Option Subsection of Section 825–10–15, to be accounted for by the equity method by the investing entity; c. trusts for the benefit of employees, such as pension and profit-sharing trusts that are managed by or under the trusteeship of management; d. principal owners of the Company; e. management of the Company; f. other parties with which the Company may deal if one party controls or can significantly influence the management or operating policies of the other to an extent that one of the transacting parties might be prevented from fully pursuing its own separate interests; and g. Other parties that can significantly influence the management or operating policies of the transacting parties or that have an ownership interest in one of the transacting parties and can significantly influence the other to an extent that one or more of the transacting parties might be prevented from fully pursuing its own separate interests.

The consolidated financial statements shall include disclosures of material related party transactions, other than compensation arrangements, expense allowances, and other similar items in the ordinary course of business. However, disclosure of transactions that are eliminated in the preparation of consolidated or combined financial statements is not required in those statements. The disclosures shall include: a. the nature of the relationship(s) involved; b. a description of the transactions, including transactions to which no amounts or nominal amounts were ascribed, for each of the periods for which income statements are presented, and such other information deemed necessary to an understanding of the effects of the transactions on the financial statements; c. the dollar amounts of transactions for each of the periods for which income statements are presented and the effects of any change in the method of establishing the terms from that used in the preceding period; and d. amounts due from or to related parties as of the

date of each balance sheet presented and, if not otherwise apparent, the terms and manner of settlement. A material related party transaction has been identified in Note 9 in the financial statements.

Subsequent events

The Company follows the guidance in Section 855-10-50 of the FASB ASC for the disclosure of subsequent events. The Company will evaluate subsequent events through the date when the financial statements were issued.

Recently issued accounting pronouncements

From time to time, new accounting pronouncements are issued by the Financial Accounting Standards Board (“FASB”) or other standard setting bodies that are adopted by the Company as of the specified effective date. Unless otherwise discussed, the Company believes that the effect of recently issued standards that are not yet effective and will not have a material effect on its consolidated financial position or results of operations upon adoption.

In December 2019, the FASB issued ASU No. 2019-12, “Simplifying the Accounting for Income Taxes (Topic 740)”. This standard simplifies the accounting for income taxes. This standard is effective for fiscal years beginning after December 15, 2020, including interim periods within those fiscal years. Early adoption is permitted for all entities. The Company is currently assessing the impact of adopting this standard on its consolidated financial statements. The Company adopted ASU No. 2019-12 effective on January 1, 2021 and it did not have a material impact on the Company’s consolidated financial statements.

In August 2020, the FASB issued ASU 2020-06, “*Debt – Debt with Conversion and Other Options (Subtopic 470-20) and Derivatives and Hedging – Contracts in Entity’s Own Equity (Subtopic 815 – 40)*” (“ASU 2020-06”). ASU 2020-06 simplifies the accounting for certain financial instruments with characteristics of liabilities and equity, including convertible instruments and contracts on an entity’s own equity. The ASU is part of the FASB’s simplification initiative, which aims to reduce unnecessary complexity in U.S. GAAP. The ASU’s amendments are effective for fiscal years beginning after December 15, 2023, and interim periods within those fiscal years. The Company is currently evaluating the impact of ASU 2020-06 on its financial statements.

NOTE 3 – GOING CONCERN

The Company’s financial statements are prepared using U.S. GAAP to a going concern, which contemplates the realization of assets and liquidation of liabilities in the normal course of business. However, the Company has negative working capital, recurring losses, and does not have a source of revenues sufficient to cover its operating costs. These factors raise substantial doubt about the Company’s ability to continue as a going concern.

The ability of the Company to continue as a going concern is dependent upon its ability to successfully execute the business plan and attain profitable operations. The accompanying financial statements do not include any adjustments that may be necessary if the Company is unable to continue as a going concern.

In the coming year, the Company’s foreseeable cash requirements will relate to continual development of the operations of its business, maintaining its good standing and making the requisite filings of financial statements, and the payment of expenses associated with operations and business developments. The Company may experience a cash shortfall and be required to raise additional capital.

Historically, it has mostly relied upon loans, convertible notes payable and cash flows from operations to finance its operations and growth. Management may raise additional capital by retaining net earnings or through future private offerings of the Company’s stock or through loans from private investors, although there can be no assurance that it will be able to obtain such financing. The Company’s failure to do so could have a material and adverse effect upon it and its shareholders.

NOTE 14 – INCOME TAXES

The Company has current net operating loss carryforwards in excess of \$864,244 as of December 31, 2021, of federal net operating loss carryforwards available to reduce future taxable income which carryforward indefinitely.

Deferred taxes are determined based on the temporary differences between the financial statement and income tax bases of assets and liabilities as measured by the enacted tax rates, which will be in effect when these differences reverse. The components of deferred income tax assets are as follows:

	2021
Deferred Tax Asset:	
Net Operating Loss	181,491
Valuation Allowance	<u>(181,491)</u>
Net Deferred Asset	<u><u>-</u></u>

Management assesses the available positive and negative evidence to estimate if sufficient future taxable income will be generated to use the existing deferred tax assets. Based on the available objective evidence, management believes it is not more likely than not that the net deferred tax assets will be fully realizable for the period ending December 31, 2021. On the basis of this evaluation, as of December 31, 2021, a full allowance has been recorded on its net deferred tax assets.

Federal and state laws can impose substantial restrictions on the utilization of net operating loss carry-forwards in the event of an "ownership change," as defined in Section 382 of the Internal Revenue Code. The Company is in the process of determining if significant limitations would be placed on the utilization of its net operating loss carry-forwards due to prior ownership changes.

As of December 31, 2021, the Company does not have any unrecognized tax benefits. As of December 31, 2021, the Company has not recognized any interest or penalties for unrecognized tax benefits.
